

### Portfolio overview – EMEA range

Husqvarna floor treatment products are all specifically developed to optimize the performance of your floor in each specific situation. They are well proven and tested to function seamlessly together and to deliver the high-quality result we expect. This enables us to provide you with full support all along the way and it also minimizes the risk of unforeseen reactions and results that might otherwise be the case.

#### HUSQVARNA FLOOR GROUTING SYSTEM

581 92 18-06	<b>GM 3000</b> 20L
529 75 09-08	<b>GM<sup>+</sup></b> 9L

Husqvarna grouting products are specifically formulated for pore filling of pin-holes and micro cracks in concrete surfaces.

**GM3000** is our primary recommendation of grouting. A ready-to use liquid that is easily spread out onto the floor and grinded down into the surface. Suitable for medium- to large-scale projects.

**GM<sup>+</sup>** is a quick drying grouting product well suited for small-scale projects where time is of essence, and/or specific areas with large pin-holes (up to 5mm) to fix. Thanks to the dry processing method we avoid slurry and the need of splash protection and also sequential cleaning of the grinders and tools. afterwards.

#### HUSQVARNA FLOOR HARDENING SYSTEM

529 75 10-09	<b>Cure (K)</b> 20L
529 75 13-07	<b>Cure (L)</b> 20L
529 75 53-01	<b>Cure +</b> 20L
529 75 53-02	<b>Cure +</b> 200L

All Husqvarna CURE densifiers provides a solution capable of increasing the abrasion- and scratch resistance of concrete, while adding basic stain resistance, limiting efflorescence and dustproofing your surface. At the same time increasing the longevity of nearly any concrete surface, from freshly poured to decades-old concrete, and to do all of this in a labor-efficient, cost-effective manner. It penetrates deep into the surface and react with calcium hydroxide present in the concrete to form calcium silicate hydrate (CSH), which progressively hydrate to a glass-like crystalline structure. The silica blend improves the density and hardness of concrete and reduces the penetration of liquids and dirt.

Husqvarna CURE densifiers comes in three different versions:

**CURE (K)** - a Potassium silicate. Ideal for densification early in the grinding process or for use on porous or trowelled floors. Well suited for large-scale projects.

**CURE (L)** - a Lithium silicate. Ideal for dense surfaces or outdoor projects and as an additional lip coat after the initial CURE application, to optimize the densification effect throughout the grinding process.

**CURE +** offers premium densification with integrated basic stain protection. It is a hybrid potassium-, lithium-silicate including also silicate to add a hydrophobic effect. Combining the strengths of both lithium and potassium silicates makes it a great multi-purpose densifier for most types of situations.

HUSQVARNA FLOOR PROTECTION SYSTEM	
501 19 79-07	<b>PREMIUM GUARD SB</b> 5L
501 19 79-08	<b>PREMIUM GUARD SB</b> 10L
593 31 50-01	<b>HTC STAIN PROTECTION</b> 10L
501 19 79-17	<b>PREMIUM GUARD WB</b> 5L
501 19 79-18	<b>PREMIUM GUARD WB</b> 10L
580 50 29-06	<b>TOPICAL GUARD WB</b> 5L
531 22 22-01	<b>TOPICAL GUARD COLOR LIGHT GREY</b> 20L
531 22 23-01	<b>TOPICAL GUARD COLOR DARK GREY</b> 20L

The Husqvarna GUARD products are all providing stain protection to concrete floors and natural stone, restricting the absorption of water, oil, fats and dirt. Stains are kept at the surface level, which simplifies maintenance and extends the lifespan of the floor. The PREMIUM-range is the primary choice when creating a SUPERFLOOR since diffusion-openness is fully preserved.

**PREMIUM GUARD SB** is a solvent based fully penetrating guard that is very easy to apply and provides premium protection. It creates a hydrophobic barrier that will prevent liquids to penetrate the polished concrete surface, but with limited protection against topical harsh spills and chemical attacks. It is not a surface/topical sealer and therefore cannot blister, wear off or discolor. It is UV stable and also aids in enhancing the color of the floor and imparts high gloss when burnished. For indoor and outdoor use.

**HTC STAIN PROTECTION** is a solvent based silane based fully penetrating guard similar to the PREMIUM GUARD SB. It provides unsurpassed protection but requires skilled operators to be applied successfully. For indoor and outdoor use.

**PREMIUM GUARD WB** is a water based penetrating guard. Very suitable on matte floors, like Husqvarna SUPERFLOOR Silver. This is an environmentally friendly and non-flammable product that is very easy to apply. It is UV stable and will not yellow, discolor, peel or flake. For indoor and outdoor use. Imparts only a faint color enhancement of the concrete when applied. Well suitable for matt floors like SUPERFLOOR Silver.

**TOPICAL GUARD** is a water based silane modified acrylic sealer that forms a microscopic semi-topical barrier. It is designed to be used when the surface is needing extra protection from topical harsh spills and chemical attacks. Suitable for interior and exterior use.

**TOPICAL GUARD COLOR** is a pigmented 2-component silicate-based impregnating sealer for protection of cementitious surfaces. Specifically developed to be used on new, uneven or rain damaged concrete surfaces or old cementitious flooring where you want to cover the floor by a homogeneous thin colored film but yet avoiding the limitations of an epoxy coating and instead preserving some of the unique features from a polished concrete floor such as keeping it diffusion open, not affecting the ESD properties, and enabling it for both indoor and outdoor use. Comes in two colors, light grey and dark grey/anthracite.

HUSQVARNA FLOOR CLEANING SYSTEM	
529 75 52-03	<b>CLEAN &amp; PROTECT</b> 5L

**CLEAN & PROTECT** is a natural soap, specially developed as a cleaning and treatment solution for concrete and natural stone floors. The soap is entirely based on natural products, and the mixed solution has a pH of 8. The solution leaves a durable upper surface that simplifies future maintenance. Can be used either with a cleaning mop or an auto scrubber.
